Medical Marijuana: The Gateway Cure to the Opioid Epidemic?

Addiction Medicine, Reactivation and Other Approaches to Pain Management

With the Opioid epidemic at its peak and climbing, we must leave no stone unturned on how to address the issue. Medical marijuana currently holds promise as a non-addictive alternative to chronic pain. This event will address the current options, alternatives to opiates, and when to refer to drug rehabilitation services when needed. In 1999 less than 17,000 individuals died from drug overdoses. This number has risen to 65,000 in 2016. Physicians need to reduce the patient's individual exposure to opioids through treatment alternatives and rapid referral to addiction specialists when needed.
